

Why We Choose Biomimetic Dentistry

Conservative, long-lasting and respectful of your natural teeth

We believe the best dental care preserves your healthy tooth structure rather than removing it. That belief is why **biomimetic dentistry** sits at the heart of how we restore teeth at Grange Road Dental.

WE CHOOSE IT BECAUSE IT

- ✓ **Helps maintain the natural strength** of your teeth
- ✓ Reduces the chance of future breakdown or repeat treatment
- ✓ Promotes comfort and long-term oral health
- ✓ Uses modern materials that closely resemble natural teeth

Our goal isn't just to fix a tooth today – it's to protect it for the future. Ask us about biomimetic crowns and BioClear fillings at your next visit, and we'll talk through the most conservative way to look after your tooth.
